Plant some GREEN in your community!

The Village of Palos Park is going GREEN & announcing a new program to plant trees right here in our community! We are joining with local partners Spring Grove Nursery & iTrees.com to offer residents of Palos Park a convenient way to beautify our local landscape.

Here's how it works:

1. Shop for trees at www.iTrees.com. You can select trees for your yard & purchase them directly online. (Make sure to use the discount code **PALOS PARK** to receive a 10% discount on your purchase!) All prices on the website include the tree, installation, tax, & a 1 year warranty. Additional volume discounts apply if purchasing more than 3 trees. These trees may be planted anywhere on your private property.
2. Soon after your purchase, your locally grown tree will be planted by iTrees.com professionals.
3. In addition to the iTrees.com discounts for residents, Spring Grove Nursery will also offer free trees to the village. For every 10 trees purchased by residents through this program, the Village will earn a free tree! These trees will be planted in our community along streets & in parks.
4. Finally, enjoy the benefits of our newly planted trees – it's that easy!

Trees provide countless social, economic, & environmental benefits to our community. Here are just a few:

- 1 Tree reduces storm water runoff by over 4,000 gals per year.
- 100 trees remove 5 tons of CO₂ from the atmosphere per year.
- Healthy trees can increase property values by an average of 10%.
- Trees provide habitat for birds, mammals, & insects.
- The roots of trees reduce soil erosion by holding soil in place, and trees reduce flooding by absorbing runoff.
- Through photosynthesis, in 1 day an average tree can provide enough oxygen for a family of 4 for that day.
- Neighborhoods with more trees have been shown to have a lower crime rate.
- Trees help people feel better – both mentally & physically.
- "Trees properly placed around buildings can reduce air conditioning needs by 30 percent and can save 20 - 50 percent in energy used for heating."—USDA Forest Service
- ... And the list goes on!

We invite you to join us in 2011 a leave a green legacy in our community to be enjoyed for future generations!
