Regulations

1. An RPZ valve must be installed on the sprinkler line of the residence or business at the connection to the water system.
 2. Submit two copies of plans of sprinkler system layout along with this application.
 3. Label all Zones and the number of Gallons per Minute used per zone and the total GPM on the plans.
 4. Contractor must notify Public Works Department 48 hours prior to commencing work to schedule an inspection.
 5. Sprinkler system to be electrically timed so that each zone is regulated as not to deprive water service of proper volume and pressure to satisfy demands of the water user.
 6. Sprinkler timers must be set to match the Village Ordinance regulating sprinkling hours.
 7. No chemicals are to be fed into sprinkler system.
 8. No pump is to be connected to the sprinkler system.
 9. No sprinkler heads can be placed in drainage or utility easements.
- **Automatic Sprinkler System – time restriction: May 15- September 15 please set your automatic sprinkler system between 12:00 midnight to 5:00 a.m. on even/odd days according to your address.
- ** This time restriction can be changed at anytime due to drought conditions. Please check our website at www.palospark.org for up to date sprinkling restrictions.
