RE: Work warehouse sill

Dear Fidel,

At your request we inspected the existing vertical base metal of your work warehouse.

We saw visible signs where there are excessive hole openings on the north, east and limited west side. The openings are due to age, punctures or the effects of the environment on a steel building.

We offered the following scope of work to fill in the openings on the north, east and limited west area.

Along with this scope, we offer a line item to replace the "outside miters" of the 4 corners of this building. We propose the following scope of work.

Scope of work

1. Furnish small tools, equipment and personnel.
2. Provide safety tape and barricades to work on approximately 190 linear feet.
3. Cut base of existing metal and approximately 8" to 12" and install new metal of your choice.
4. Install new aluminum 032 metal with new fasteners. Metal will have drip edge.
5. Make necessary opening at pipe penetrations and seal with backer rod and caulk.
6. Remove scrap metal and dispose on site.
7. Remove equipment upon completion

*See Color chart

Our price \$7,496.00

****Note Work to be done by sheet metal mechanics**

"Watertight at Night"

Qualifications and Exclusions

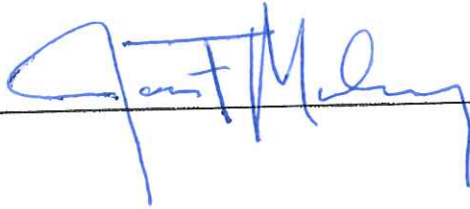

- No delays by others
- No overtime
- Terms: net 10 days
- All union labor
- Proposal valid for 30 days
- Excludes applicable taxes
- This proposal excludes overtime, permits, bonds and snow removal.
- Bid presumes reasonable access.

Should you have any questions please call our office.

Best Regards,

John Cronin
